

## ME-B Series 65" and 75" Commercial LED LCD Displays

Slim and lightweight with narrow bezels.  
And yet they make a huge impact.

### Large-Format LCD with Premium Picture Quality, Content Versatility and Lower TCO

Samsung displays have always impressed people in a big way. But now they're going even bigger. Our new 65"/75" ME-B Series delivers huge impact with superb picture quality in sleek, stylish form factors. Thanks to Samsung's LED BLU panel technology, you get deeper blacks, brighter colors and reduced blurring. They're ideal for a wide range of environments, from education and retail to finance, healthcare and government. Of course, being ultra-slim, they save space. Being ultra-light, they enable easier installation and maintenance. And being Samsung, they do it all with style. **Business. Innovated.**

#### Slim and Light LED Design

The slim and lightweight design of the ME-B Series provides energy savings of 75% (65") and 59% (75") over CCFL backlit displays. The stylishly thin chassis helps simplify installation, and narrow bezels deliver a more impactful message.

#### Edge-Lit LED Screen

The edge-lit 65"/75" displays of the ME-B Series feature 1920 x 1080 resolution with up to 550 nits brightness (ME75B model) and 5000:1 contrast ratio for sharp, detail-rich images and crisp, easily legible type.

#### Embedded Media Player with MagicInfo Lite

The ME-B Series offers an embedded media player (USB Plug and Play with MagicInfo Lite software). Users can play media without an additional player, and can easily display or schedule video clips, slide shows and image files.

#### RS232 Control and Smart Scheduling

Easily control such functions as power on/off, source, volume, channel, brightness and contrast. Smart scheduling enhances the user experience and displays specific content on a scheduled loop.

#### PIM Option

Samsung's Plug In Module accessory provides a built-in PC solution while eliminating cables and external hardware for a clutter-free environment.

#### Interactive White Board

Add an optional touch overlay accessory (ME65B model) to enable interactive white board functionality.
