

The XTABLE

Beautifully integrated

The XTABLE 3M is a complete ruggedized 46" projected capacitive multitouch table that is equipped with a powerful integrated PC, smart power management and hardware health monitoring system. The water and dust resistant display supports up to 60 touch points with palm rejection.

To get you started immediately, every XTABLE includes a full featured, commercial version of Touchtech LIMA, the professional multi-touch presentation and collaboration software.

XTABLE

Designed to impress

Engineered to last

Every single component has been carefully selected to make the XTABLE a true "plug-and-play" multi-touch product and because reliability is key, the integrated power management and hardware health system makes sure that you can always count on it.

Your brand & style is unique, and so is the XTABLE. The eye-catching leg structure has an extremely durable surface, which can be ordered in any color and is also a perfect base material for decaling.
